

Case study: Global Payments Platform Technical Consolidation

The Opportunity

After the Global Payments acquisition of two Australian companies, Ezidebit and eWAY, both continued to operate in isolation, leaving customers with the impression they were dealing with different brands.

The project's aim was to consolidate both operators under the Global Payments brand, with no disruption to daily ongoing services.

4impact's Approach

4impact was engaged to help gain traction on this strategic initiative by increasing capacity, facilitating communication between departments and delivering quality DevOps solutions in a risk averse, yet agile environment.

Project Outcome

Global Payments is now able to offer consolidated API services to their customers, as well as cutting edge improvements to the existing payment capabilities including; Payments Network Tokenisation, upgraded Masterpass and VISA Checkout digital wallets.

**RAPID ENVISAGING
AND AGILE
DEVELOPMENT**

**BLENDED DELIVERY
